Subject: EPA Update on Gold King Mine Response: Additional Data Results and Public Records - August 31, 2015

Hi all,

I wanted to let you know that EPA will be posting on our website an update on water quality and sediment data for the Animas and San Juan Rivers, as well as additional public records on the Gold King Mine response. These documents include:

- Documents related to a previous NPL listing package for the Upper Animas Mining

District National Priorities Listing: <http://www2.epa.gov/goldkingmine/august-31-2015-documents-related-prior-national-priorities-list-discussions>

- ☐☐☐☐☐☐☐ Additional photos from the Gold King Mine response:
<https://www.flickr.com/photos/usepagov/albums/72157654862884644>

- ☐☐☐☐☐☐☐ Sediment and water quality results for the Animas and San Juan Rivers. EPA has done a review of the data which included a comparison to screening levels for exposure during recreational use to determine if metal concentrations are consistent with pre-event levels. Based on the results of all the sediment and water quality samples, concentrations are trending toward pre-event conditions. The data will be posted at: <http://www2.epa.gov/goldkingmine/data-gold-king-mine-response>

Please let me know if you have any questions,

Rebecca
